

Deep Drill Supply Group

Your fast and reliable partner between manufacturing, stock and drilling

The Deep Drill Supply Group supplies drilling equipment and tubulars for drilling and workover operations both inland and offshore, for oil, gas, geothermal energy and salt mining.

We sell, rent, and service a wide variety of high quality OEM drilling equipment, tubulars and accessories from independent mills and manufacturers – from hardware components to complete drilling rig packages and well set-ups.

The Deep Drill Supply Group offers a unique combination of resources, experience and expertise. Our project teams deliver safe, on time, efficient and cost-effective solutions.

▶ Who we are

The Deep Drill Company was founded by B.G.H van Amsterdam in 1980. The company now has over 30 years of industry experience and is still family owned. Thesecond generation Van Amsterdam entrepreneurs recognized the need for an expertise center in Europe combining supply, storage and handling services and thus created a hub with specialized companies for hardware and expertise in well set-ups and rig packages, which became the Drilling Service Center. The Deep Drill Supply Group is a standing member of the Drilling Service Center and together with her partners, they offer expert integrated services to smoothen your operation.

▶ Location

Our distribution center is conveniently located in the Netherlands in Western Europe with an excellent land, sea and air transport network and communication network throughout the world. We have branch offices in Algeria, Egypt and Romania providing support to our customers locally.

▶ Product lines Sales and Rentals

We offer a wide range of OEM drilling equipment: pressure control, flow line, and drill string equipment, and also a well equipment: OCTG, cement and float and wellhead assemblies.

▶ Services

In addition to sales and rentals, we offer services, such as engineering, maintenance and repairs, and testing and recertification.

▶ Engineering

We engineer wellhead, flowline and other pressure control assemblies according to industry and specific customer requirements. Engineering is performed in close cooperation with our OEM partners.

▶ Accurate information

We take pride in our digital stocking, planning and information system, which enables us to provide our customers with precise information on availability, condition, certification and capacity. Moreover, our long industry experience has resulted in an extensive database with technical data and related information on components of our OEM partners and other manufacturers.

▶ Competence, safety and environment

Excellence in safety is a core value for our company. Besides the high level of experience in our senior and middle management, we train our team members according to the highest standards set for our industry. All our coordinators and supervisors are trained and qualified in basic and advanced drilling technology, safety, OEM engineering, maintenance and customer support.

We continuously develop our operating procedures and train our people according to environmental regulations and the latest insights in sustainability.

▶ **Technical standards**

We provide consistent quality in accordance with the products and procedures of our OEM partners.

All our equipment and tubulars are serviced in compliance with industry standards and the standards of our OEM partners. Only OEM spare parts are used, and repairs and modifications are executed according to the manufacturer's instructions and required industry standards.

▶ **Quality control and certification**

In order to assure the highest quality and to inspire the greatest confidence in the equipment and tubulars we send to the rig, we cooperate with reputable, independent and experienced inspection companies and consultants, both in-house and at our OEM partners.

Third party quality control is carried out in compliance with OEM specifications, ISO, ANSI, API, ATEX, CE, DNV, PED, NS and specific operating requirements of our customers.

We are certified by Lloyd's for our quality management (ISO 9001:2008, ISO/TS 29001) and health, safety and environmental management (ISO 14001, OHSAS 18001) for product and service supply organizations in the petroleum, petrochemical and natural gas industries according to worldwide standards.

▶ **Trade Association Memberships**

In order to stay up to date about industry standards, procedures, products and market developments, we have been a longstanding member of the following associations: API (American Petroleum Institute Standards), IADC (International Association of Drilling Contractors), SPE (Society of Petroleum Engineers), FPAL, EGEC (European Geothermal Energy Council), Fearnley, Proctor (NS standards), IGA (International Geothermal Association), GtV-Bundesverband Geothermie and Platform Geothermie Nederland.

▶ **Contact us**

If you would like to have more information, please do not hesitate to contact us. If you wish to visit us, you are always welcome at our distribution center at the **all in one** - Drilling Service Center.
